and Research
- 3 > Environmental
& Archaeological Affairs
- 4 > Media
- 5 > Culture

Vision:

Lebanon as a cultural meeting point embracing diversity, and a pioneering educational model to be emulated by countries in the region.

Strategy and Services:

› Section One: Educational System

- 1- Restructure and develop educational curricula, provide a healthy learning environment, activate student exchange programs, and pay attention to students with special needs.
- 2- Reformulate history and civic education textbooks as a foundation for building citizenship.
- 3- Train and qualify educational staff and monitor their performance to align with the national vision.
- 4- Utilize technology in education, streamline it, and develop and monitor curricula.
- 5- Impose national curricula on missionary, private and party-affiliated schools.
- 6- Implement the educational pyramid and ensure communication among its elements: knowledge material, teacher, community, and citizen-student.
- 7- Align university and vocational specializations with the needs of the Lebanese, local, and global labor market.
- 8- Develop a national program for university classification and improve education quality.

› **Section Two: Scientific centers and research**

1. Support scientific research and patents and find funding through partnerships with the private sector, companies, and Lebanese expatriates.
2. Create an encouraging environment for talented individuals by selecting them from universities and schools, providing necessary resources for scientific research, registering patents, and creating a prototype product.
3. Partner with global scientific research centers and benefit from Lebanese expatriates.

Strategy and Services:

› Section Three: Tourism, Environment, and Archaeological Affairs

Concerning the Environment:

1. Protect and develop current environmental reserves and create new ones.
2. Regulate the work of quarries and set an executive plan for them.
3. Clean rivers, protect them from pollution, and use their water for irrigation (create investment opportunities for tourist resorts near rivers in exchange for cleaning the rivers).
4. Equip waste treatment plants to extract fertilizers and generate electricity within an expanded decentralization program to have a plant in each governorate.
5. Impose a municipal tax for waste collection: established by the Waste Management Authority and collected by municipalities, this tax will allow for local funding, household waste recycling, and transportation to centers.
6. Privatize waste collection on a regional basis (in each governorate) with a commitment to transparency and under the supervision of a regulatory body for the operators responsible for waste collection.

7. Establish an independent waste management authority responsible for controlling, monitoring, and policy-making for waste treatment, recycling, sewage treatment, and urban pollution.

8. Impose selective waste sorting at the source for individuals and companies.

9. Clean and rehabilitate landfills, and clean beaches, natural sites, villages, and mountains.

10. Adopt a master plan to combat pollution with regulations for waste

management, sewage treatment, pollution control, and recycling of plastics and excavations. Appoint an international expert to assist in implementing and adopting the master plan and establish a company responsible for technical specifications, tendering, contract granting, and coordinating with regional authorities and private operators in setting quality controls.

11. Call for donations for water collection and treatment networks at regional and national levels under the supervision of the Waste Control Authority.

Strategy and Services:

› Section Four: Media

1. Support and restructure the national television (Tele Liban) to be competitive locally, regionally, and internationally.

2. Establish a regulatory body for media to monitor media content (cinema, theater, publications) to align with the national vision, avoiding sectarianism and incitement while preserving media freedom.

3. Ensure the right to access information for every citizen or journalist to enhance transparency and set practical mechanisms for its implementation.

4. Enact laws and regulations to guarantee internet freedom as a basic right for every citizen.

5. Implement training programs on media and human rights in

partnership with media colleges in universities, covering media and conflicts, media and development, investigative journalism, inclusive journalism, reform journalism, and new digital media.

6. Reduce the influence of domestic and foreign political money on media and liberate national consciousness from sectarian, ethnic, and regional tensions.

7. Support new and independent media platforms that can serve as practical and scientific guides for media sector workers.

8. Monitor electoral media in media institutions to achieve neutrality and balance in coverage and provide access to all parties.

Strategy and Services:

› Section Five: Culture

1. Establish inclusive national culture and support cultural activities.
2. Create inclusive cultural content within national institutions.
3. Shift Lebanese minds from a factional cultural framework to a national cultural framework.
4. Launch a cultural modernization process under the rule of law and governance, with the cooperation of Lebanese expatriates to transfer expertise, readiness of educational institutions (schools, universities, educational institutions), and information and social media technology.
5. Utilize the roles of artists to deliver and unify cultural content.
